

Job Description

Title: Transaction Reporting Officer

About the company

TRAction Fintech is a specialist Fintech (financial services technology) company with a software and service solution to provide financial product issuers a means to report their daily transactions in accordance with their regulatory requirements.

The current Regulations covered by TRAction are MiFIR, EMIR and SFTR

About the role

The specific tasks of the role are:

- Ensuring all transaction reports are submitted within T+1 for TRAction clients
- Resolve reporting errors on a daily basis
- Assist and advise on mapping of data fields from our clients internal systems to Trade Repository / Regulator required fields
- Data Cleansing of source/extract data to respective systems using SQL
- Assist in application support and customer service for TRAction Fintech clients
- Liaising with TRAction Fintech's operational team in Australia

The Successful Applicant

We are looking for an IT professional to work in a very small team, be a jack of all trades, be eager to learn and grow with the company, with the following experience and attributes:

- Excellent attention to detail
- Comfortable using a SQL database
- Experience in an Operational role within the Financial Services Industry desired, preferably in the derivatives industry
- High level skills in providing accurate and validated data administration
- Demonstrate initiative and positive professional attitude
- Clear communication skills especially in documentation and liaison
- Excellent business and technical analytical skills
- High level problem-solving skills
- Experience with data conversion and extraction desired
- Excellent Microsoft Office skills, especially Excel
- Appropriate tertiary qualifications or equivalent experience

What's On Offer

- Full time role
- Exciting fast-growth company and great working environment
- Opportunity to be trained and specialise in a major growth area in the financial markets
- Generous compensation package
