

Job Description

Title: QA Developer

About the Company

TRAction is a leading company in the global Regtech industry providing regulatory trade reporting solutions and services to businesses dealing in OTC derivatives and other financial products requiring transaction reporting. We support over 100 clients across the world to meet their regulatory reporting obligations and report over 10 million trades daily to global regulators including ESMA, the FCA, ASIC and MAS. We are an innovative company with a diverse team of driven professionals steering TRAction's successful and continued expansion.

Join us to work alongside a highly experienced and vibrant team, access opportunities for career growth and further training, gain experience liaising with global clientele, and develop invaluable skills within both the finance and rapidly expanding Regtech industry.

About the Role

The tasks involved the role of a QA Developer at TRAction are but not limited to:

- Review and understand current systems and processes
- Build an automated testing model to review expected outcomes vs actual outcomes
- Implement a regression testing model to ensure code changes haven't released bugs in other places
- Converse directly with the Business and IT teams to ensure suitable understanding of requirements and required test coverage
- Create test cases and test scripts
- Help to create testing data with direction from the business and the requirements
- Help to create expected outcomes and test cases with direction from the business and the requirements
- Analyse and create a way to share results to the development and business teams
- Raise and manage any bugs and issues found in testing
- Present ideas for system improvements
- Work closely with managers and other staff on product design
- Database design
- Preparation of training for users on developed systems
- Maintain the systems once they are up and running
- Assist in application support
- Coordinate software rollouts and revisions
