

Job Description

Title: Software Developer

About the Company

TRAction is a leading company in the global Regtech industry providing regulatory trade reporting solutions and services to businesses dealing in OTC derivatives and other financial products requiring transaction reporting. We support over 100 clients across the world to meet their regulatory reporting obligations and report over 10 million trades daily to global regulators including ESMA, FCA, ASIC, MAS and Canadian regulators. We are an innovative company with a diverse team of driven professionals steering TRAction's successful and continued expansion.

Join us to work alongside a highly experienced and vibrant team, access opportunities for career growth and further training, gain experience liaising with global clientele, and develop invaluable skills within both the finance and rapidly expanding Regtech industry.

About the Role

TRAction Fintech is currently seeking a Software Developer to join our team. The ideal candidate will be comfortable working with large amounts of financial data and will have strong experience with MS SQL. Some key components of the role:

- Develop quality software and web applications
- Analyse and maintain existing software applications
- Design highly scalable, testable code
- Discover and fix programming bugs
- Collaborate with the team to continuously improve our data processing capabilities
- Working closely with cross-functional team on product design
- Testing the product in controlled, real situations before going live
- Database design
- Training other staff members on developed systems
- Maintaining the systems once they are up and running
- Assist in application support, helping with any code issues that may arise
- Coordinating software rollouts and revisions

Qualifications and Skills

- A degree in Computer Science, Engineering, or related field
- Extensive experience with MS SQL
- Competent and proficient in C# and building .NET applications
- 2 years of experience in a relevant field
